- 6/17: Grilled Chicken Breast with Sides
- 7/01: BBQ Brisket, Sausage with Sides

Michelle Fettig and Bill DiGaetano

➤ THIS WEEKS PROGRAM

Temple College has traditionally offered pre-professional courses leading to degrees in medicine, law, education, engineering, and similar fields as well as more general academic courses that enable students to transfer to four-year institutions for baccalaureate degrees. The technical program of the College expanded with the opening of the Watson Technical Center in 1967. In recent years a wide variety of credit and non-credit classes, programs and workshops have been offered through Business and Community Education. Temple College became a leader in education for health professions with the opening of a new Health Sciences Center and Clinical Simulation Center in 2004. With an enrollment of more than 6,100 students, the College is large enough to maintain a flexible and varied program. It is, at the same time, small enough to provide students with opportunities for the development of leadership abilities. Small class size makes possible a close personal relationship between students and their instructors. In 1996, the name of the College was changed to Temple College to reflect its role as a comprehensive college, offering transfer programs, technical education, community education, career and workforce training, and cultural activities. The college now offers day and evening classes; technical and workforce training; on-campus, online, hybrid, and web-enhanced courses; and continuing education classes. The main campus now exceeds 108 acres, including 27 buildings. University Courtyard Apartments provide apartment-style student housing and Temple College Apartments provide housing for low-income student families. Both facilities are located on the east side of the main campus. The Danny Scott Sports Complex includes a gymnasium, fitness center, baseball and softball fields, and an intramural field. Temple College also operates at five off-campus locations.

Degree Opportunities

Associate of Arts (AA) Degrees The two-year Associate of Arts Degree, Core Curriculum for Academic Transfer and Field of Study is a great starting point for students who plan to continue work toward a bachelor's degree at a four-year university - Art, Biology, Business Administration, Chemistry, Computer Science, Criminal Justice, Drama, English, General Studies, History, Math, Music, Psychology, Physical Education, Physics, Pre-Law, Pre-Med, Speech, Sociology

Associate of Applied Science (AAS) Degrees
